

Remote Haven — Job Post Analysis

ABT Talks 60-Day Claude AI Mastery Challenge · Day 14 · June 15, 2026
Analyst: Deborah Olofin · Data Scientist & ML Engineer · Lagos, Nigeria

Risk Score	Verdict	Financial Risk	Data Privacy Risk
68/100	Apply with Caution	LOW	MEDIUM

Top Red Flags

Severity	Issue	Detail
9/10	Fraudulent UK registration number	Website claims DANFAL LTD reg. 8720755 — Companies House shows this number belongs to First Securities Group Magna Limited, a completely unrelated entity. DANFAL LTD does not exist under this number.
8/10	Zero salary transparency	No salary range, no compensation structure, no currency disclosed — not in the post, not on the website. For a placement agency targeting global brands, this is a significant red flag.
8/10	Video introduction = data privacy exposure	Applicants are asked to submit CV, cover letter, LinkedIn profile, phone number, AND a video introduction (Google Drive link) before any verification of company legitimacy. This is a high-volume personal data collection request from an unverified entity.
7/10	Six roles, zero individual job descriptions	Data Analyst, Data Entry, Data Engineer, Data Scientist, DBA, Data Migration Analyst — all announced in one post with no separate JDs, seniority levels, or requirements per role.
7/10	No third-party reviews or placed candidates	Zero Trustpilot, Glassdoor, or Google reviews. No public testimonials from placed candidates. Company appears to have launched late 2025.
6/10	CEO not verifiable on LinkedIn	Daniel Falomo HRCI has no findable LinkedIn profile connected to Remote Haven. The HRCI credential is listed without specifying certification level (PHR, SPHR, etc.) — non-standard practice.
5/10	Unverified third-party job poster	The post came from @BenoHr80463, a generic handle with no company account tag. Job posts via unverified intermediaries add an extra layer of opacity to the hiring chain.

Risk Breakdown by Category

Category	Risk Level	Score
Company trust	CRITICAL	85/100
Hiring clarity	HIGH	72/100
Data privacy	MEDIUM	60/100
Requirements	LOW	30/100
Culture signals	LOW	20/100
Remote validity	LOW	25/100

Positive Signals

- + No fees from job seekers — revenue model is B2B (businesses pay, not candidates). This eliminates the primary marker of classic employment scams.
- + CFO Yetunde Oludare (AAT, ACA) has a verifiable LinkedIn profile linked directly from the company About page — real credentials, real identity.
- + The business model (Nigerian talent placed with Western companies) is a legitimate and actively growing industry sector.
- + Active multi-channel presence: Instagram, LinkedIn, YouTube, TikTok. Not a ghost brand.
- + Real Lagos phone number (+234 701 981 8297) and physical address in Ikeja — locally contactable.

Verdict

Remote Haven is not a traditional scam — they are not asking job seekers for money, and there are verifiable individuals attached to the business. However, the UK company registration number is demonstrably wrong, which is a serious credibility issue that cannot be explained away as a startup oversight. The hiring post is also extremely vague: six roles, no individual job descriptions, no salary information.

For a job seeker in data science, the data privacy risk is the most immediate concern. The application package requested (CV, cover letter, LinkedIn, phone number, video introduction) is a large personal data footprint to submit to a company whose legal identity cannot be verified. This risk pattern matches known identity theft and fraudulent reference schemes.

Recommended action: Do not submit an application until you have confirmed the UK registration discrepancy directly with the company and verified Daniel Falomo's identity on LinkedIn. Hold sensitive documents (NIN, BVN, passport) back entirely until after a verified in-person or video call with a named, verifiable individual.

5 Smart Interview Questions

Q1. Registration verification

"Your website lists DANFAL LTD with UK registration number 8720755. When I checked Companies House, that number belongs to a different company. Can you clarify how Remote Haven is incorporated in the UK?"

Q2. Compensation structure

"For the Data Scientist role specifically, what is the salary range, which currency is compensation paid in, and at what stage of the process does a formal offer become binding?"

Q3. Track record

"Can you share two or three case studies or public LinkedIn profiles of data professionals you have successfully placed? I would like to understand client profiles and typical timelines."

Q4. Data handling

"What personal documents are required at each stage of the process, and what is your data retention and privacy policy for candidate information submitted during the application?"

Q5. Placement continuity

"What is the typical timeline from application to placement for a Data Scientist role, and if a client engagement ends, do you actively re-place the talent or is the contract simply terminated?"
